ABSTRACT

The 12th Annual Survey of Graduate Science and Engineering Students and Postdoctorates requested data from all institutions of higher education in the United States in which there was at least one science or engineering program leading to a master's or doctoral degree, including medical schools and other components granting first-professional doctorates in health-related fields. These data are presented in detailed statistical tables provided in five parts labelled A-E. The first part includes summary data for all institutions, both doctorate- and master's-granting for fall 1983. The second part presents summary trend statistics from all graduate institutions, 1976-1983. The third and fourth parts show similar trend statistics for doctorate-granting and master's-granting institutions. The tables in the last part provide information on total departmental coverage along with rankings of individual institutions on the basis of fall 1983 data. Among the variables considered are sex, race, citizenship status, geographic distribution, type of control, full-time status, and part-time status. Also provided are technical notes, and copies of 1983 survey forms together with survey instructions and summaries of institutional responses. (JN)

To obtain accurate historical data, use only the latest detailed statistical tables for fall 1983 (NSF 85-300) and not data published earlier. Institutions revise prior-year data when important changes occur in reporting practices and program classifications, and only the latest tables incorporate such changes.

# general notes

This report presents data collected in the twelfth annual Survey of Graduate Science and Engineering Students and Postdoctorates, covering fall 1983. The survey universe included all institutions in the United States which had departments or programs offering master's or doctorate degrees in science and engineering (S/E) fields, including medical schools and other components granting first-professional doctorates in health-related fields.

Enrollment and support data for fall 1983 are presented in section III, which is divided into five subsections (A through E). Subsection A contains fall 1983 summary data for all graduate institutions, both doctorate- and master's-granting; subsection B presents summary trend data for all graduate institutions covering 1976 through 1983; subsections C and D contain similar trend statistics for doctorate-granting and master's-granting institutions separately; and subsection E shows summary information on departmental coverage along with rankings of individual institutions on the basis of fall 1983 data. Section IV displays survey questionnaire formats as well as summary questionnaire facsimiles containing data for all departments and for those in each level of highest degree granted, broad S/E field, and type of institution.

Data presented for doctorate-granting institutions include all institutions with any component (medical school, dental school, etc.) or branch campus granting S/E doctorates (including first-professional doctorates in health-related fields), for all years in which such degrees were offered. This definition differs from that used by the National Center for Education Statistics (NCES) in that the National Science Foundation (NSF) includes institutions granting first-professional medical degrees in this category, while NCES classifies such institutions as "professional and specialized institutions." The distinctions between the NSF and NCES classification systems are discussed in greater detail in section II of this report.

The following definitions and limitations should be borne in mind in all analyses of the data included in this report:

- The expression "institutional support" in tables showing full-time graduate enrollment by source of support denotes students receiving their primary support from State and local governments as well as from their institutions.
- The term "Other U.S. sources" refers to industrial firms, nonprofit institutions (independent research institutes, professional societies, phi-
- lanthropic foundations, etc.) and all other sources of support originating within the United States. Students supported primarily by foreign industrial firms, as well as foreign governments, are reported under "foreign sources."
- The expression "imputation" refers to a computerized process which generates estimates for nonrespondent institutions on the basis of their own data from earlier years, where available, or from peer institutions. Data may be imputed for an entire institution, for a department, or for individual items or cells within items for which the institution or department was unable to provide actual data. For institutions or departments which responded to earlier surveys in the series, the most recent data available were either increased or decreased to reflect the growth or decline in the relevant variable reported by similar departments. If no prior-year data were available, the totals were distributed on the basis of factors derived from responding departments in the same field and level of degree.
- Since respondent institutions are given the option of revising prior-year data as well as current data during the editing process, only the trend data

published in the most recent report should be used in historical analyses.

Data published in this report are also available in machine-readable format on magnetic tapes. A multi-year data tape contains data for fall 1976 through fall 1983; single-year data tapes are available for 1975 and earlier years and for 1983. Information on tape formats and years available, along with ordering instructions and prices, are contained in the *Data User Guide* which is updated annually. In addition, selected trend data

on an individual institution basis, comparing graduate enrollment data with information from NSF's other academic S/E surveys on R&D expenditures, Federal support, and scientists and engineers employed, are available in Institutional Profiles for each doctorate-granting institution. To order Institutional Profiles for any institution or group of institutions, please contact Richard Benno; for a copy of the latest *Data User Guide* or to obtain additional information on the graduate student survey findings, con-

tact J. G. Huckenpahler. Both may be reached at the following address and telephone number:

## technical notes

### the survey universe

Data from the fall 1983 Survey of Graduate Science and Engineering Students and Postdoctorates (GSESP) published in this report represent all academic institutions in the United States which granted doctorate- or master's-level degrees in any science or engineering (S/E) field. Institutions included data for their branch campuses, affiliated research centers, and separately organized components such as medical or dental schools, schools of nursing, public health, etc. The final 1983 survey universe consisted of 731 reporting units at 617 institutions. Of these, 438 reporting units were associated with 324 doctorate-granting institutions and 293 represented master's-granting institutions.

Data on graduate S/E enrollment and postdoctorates have been collected by the National Science Foundation (NSF) on an annual basis since 1967. For fall 1967 through fall 1971, data were collected through the NSF Graduate Traineeship Program; data for fall 1972 and succeeding years have been collected through the GSESP surveys. It should be noted, however, that the Graduate Traineeship Program collected data from only a limited number of doctorate departments in doctorate-granting institutions on their applications for traineeships in the fields supported by NSF. Expansion of the survey to universe coverage occurred gradually over the 1972-75 period. Data for 1967 through 1974 are therefore not strictly comparable with

data for 1975 and subsequent years. Table I-1 shows the number of institutions, reporting units, and departments at each

degree level which were included in the survey universe in each year from 1967 to 1983.

1/ THE NAME OF THE SURVEY WAS CHANGED IN 1981 TO SPECIFY THE INCLUSION OF ENGINEERING.  
2/ THE 1972 SURVEY OF DOCTORATE-GRANTING INSTITUTIONS INCLUDED SELECTED DATA ITEMS FOR 1971.  
3/ THE 1976 SURVEY OF MASTER'S-GRANTING INSTITUTIONS INCLUDED SELECTED DATA ITEMS FOR 1975.  
4/ THE 1978 SURVEY DID NOT INCLUDE MASTER'S INSTITUTIONS. ONE INSTITUTION WAS SUBSEQUENTLY CHANGED FROM DOCTORATE- TO MASTER'S-GRANTING.

NOTE: N/A - NOT APPLICABLE  
SOURCE: NATIONAL SCIENCE FOUNDATION

The decline in the number of graduate departments in doctorate institutions which began in 1981 is largely the result of a systematic effort by NSF to identify and delete those departments or programs, especially in medical schools, which have discontinued their graduate S/E programs. Increasing financial constraints in the early eighties have led in-

stitutions to slow down the creation of new programs and merge others and, in some cases, to eliminate recently established graduate programs. In medical schools, in particular, a number of departments which had continued to participate in the GSESP survey on the basis of their expectation of establishing or re-establishing graduate programs indi-

cated that they felt such expansion to be increasingly unlikely.

Tables I-2 and I-3 present data on departmental coverage in each broad S/E field for each of the years 1976 through 1983, along with total full-time enrollment in each field, for doctorate- and master's-granting institutions. The 1978 survey collected data from doctorate-level institutions only.

# **the survey instruments**

The Department or Program Data Sheet (form 812) used for the fall 1983 GSESP survey was almost identical to the fall 1982 version, except for items 9 through 12 requesting data on full-time S/E faculty, which were optional in 1982 but became a part of the standard questionnaire in 1983. Data collected in these items will be presented in a separate report.

Also included in the survey package for each responding entity were a flier explaining the NSF's academic S/E survey system; a computer-generated List of Departments or Programs (form 811) as determined by the responses to the previous survey; a "Crosswalk" linking fields of science and engineering as defined by NSF with the instructional program codes designed by the National Center for Education Statistics (NCES) in 1981; a flow chart for the assistance of those institutions or departments using computerized records to compile their submissions; and a postcard for the institutions to indicate changes in coordinator name, address, or telephone number. A set of 1983 GSESP survey instruments is reproduced in section IV.

## **Survey methodology**

Survey packages were mailed out by November 25, 1983, to all institutions known to have S/E graduate students and/or postdoctorates on the basis of the fall 1982 GSESP data, as well as to four new institutions believed to be eligible for inclusion on the basis of information from NCES. Three more institutions were added later in the survey cycle.

Institutional coordinators were asked on the postcard to indicate the sources of the data reported, whether centrally-maintained or collected from the individual departments and whether computerized or hand-tabulated. Of the 535 coordinators providing this information (81 percent of those submitting responses), 5 percent indicated their exclusive reliance on a computerized central records system; 15 percent reported that their responses were hand-tabulated in the central office; and 39 percent relied entirely on hand tabulations submitted by respondents in each depart-

ment. The largest number, 41 percent, reported a combination of sources. These proportions are very similar to those reported in 1982 and indicate that further automation is not yet feasible.

The coordinators were requested to review the departmental listings shown on the form 811 and to make any changes needed as a result of organizational modifications such as the creation of new departments, phasing out of old departments, departmental splits or mergers, and name changes. In addition, coordinators were asked to check off those departments that had neither graduate students nor postdoctorates at that time and for which form 812's would therefore not be submitted. The updated form 811 then served as a checklist in keeping track of departmental responses.

The form 812's were filled out either centrally or at the department level and returned to the data processing contractor along with one copy of the form 811, for data entry, editing, and tabulation. Any errors, inconsistencies, and major year-to-year fluctuations were referred to the institutional coordinators for correction or explanation. Institutions reporting large numbers of full-time graduate students as receiving their primary support from "other Federal sources" or "other U.S. sources" were asked if they could provide further data on the specific Federal agencies or types of other organizations (e.g., business firms, philanthropic foundations, professional societies, etc.) and the number of students receiving their primary support from each. The 277 departments responding to this request for further detail accounted for 2,300 graduate students supported by "other Federal sources" and 1,700 supported by "other U.S. sources." The Department of Energy was the largest of the Federal agencies listed, accounting for 29 percent of those supported by all other Federal agencies, followed by the Department of Agriculture, with 25 percent. Of those supported primarily by "other U.S. sources," industrial firms were the major source of funding for 64 percent, and nonprofit organizations for 36 percent.

## **the response rate**

Of the 617 institutions included in the final 1983 data base, 554, or 90 percent,

were able to respond with at least partial data, including 306, or 94 percent, of the doctorate-granting institutions surveyed. At the department level, complete responses were received from 8,070 of the 9,663 departments included in the final count, or 84 percent of the total. An additional 816 departments, 8 percent of the total, were able to provide partial data. As in earlier years, missing data for completely and partially nonrespondent departments were machine-imputed using the methods described earlier.

Tables I-4 through I-7 show the numbers of departments requiring total or partial imputation and the numbers and proportions of full-time and part-time graduate students and postdoctorates imputed. Imputation rates for doctorate-granting institutions, shown in tables I-4 and I-5 were significantly lower than those for master's-level institutions (tables I-6 and I-7).

Imputation rates for most cells of the survey questionnaire were somewhat lower in 1983 than in 1982, although still not as low as in 1980 and earlier years when only a few cells showed imputation rates higher than 5 percent. Among the reasons for the higher nonresponse rate in 1981 (13 percent) were personnel and funding cutbacks and subsequent increases in workload, as well as increasing resistance to data collection surveys in general. The increased response rate which began in 1982 is believed to be the result primarily of an earlier mailout date that resulted in a longer leadtime and more intensive follow-up procedures, especially with larger institutions and those with a history of nonresponse.

The fall 1983 survey included four questions on faculty (items 9 through 12) as a part of the regular questionnaire for the first time, as indicated earlier. The departmental response rate on these items was up dramatically from the previous year, from 35 percent to 80 percent. As in 1982, the response rate was higher in doctorate-granting institutions, although the difference between the two groups of institutions was not as great. The increase in the response rate enabled machine-imputation procedures analogous to those for the enrollment items to be applied. Data derived from the faculty items, when published, will therefore represent national estimates.

## **section ii**

# **classification of institutions**

A complete listing of all graduate institutions which were included in the GSESP survey universe for fall 1983 is presented in tables II-1 and II-2. For institutions consisting of more than one reporting unit, all such separate units are shown under the parent institution. Doctorate-granting institutions are presented in table II-1; those whose highest S/E degrees are at the master's level are shown in table II-2. In both tables, institutions are listed alphabetically within State.

For the assistance of those wishing to order Institutional Profiles as described in the General Notes for their own or selected peer institutions, tables II-1 and II-2 now include the Federal Interagency Commission on Education (FICE) codes for each institution. It should be noted that Profiles are available only at the institutional level; separate Profiles have not been generated for individual components or branch campuses within an institution.

As in earlier years, tables II-1 and II-2 also include the Institutional Classification Codes for all separate institutions. These codes, designed by NCES in 1981 to replace the Carnegie Commission Codes which were last updated in 1976, classify all institutions recognized by NCES on the basis of three criteria: (1) Number of degrees awarded, by level of degree; (2) number of fields in which degrees were awarded; and (3) the ratio of degrees awarded in selected fields to the total number of degrees awarded.

Because of the difference between the criteria used by NCES and NSF in classifying institutions, many individual institutions show wide variation in their classifications under the two systems. Thus, for institutional category A, "Doctorate-Granting Institutions," NCES includes only those 161 institutions believed to have had "a significant level of activity" and "diversity in doctorate program offerings." The 324 institutions shown in table II-1, by comparison, include all those with *any* doctorate S/E programs, including first-professional doctorates in medical and health-related fields. The data presented in the "doctorate-granting institutions" column of table A-5, section III, are based on the NCES system and should not be compared with data on doctorate-granting institutions shown elsewhere in this report.

The NSF survey universe is drawn primarily from categories A and B, with some institutions from categories C and D. All institutions in category E are excluded by definition. The NCES institutional classifications used in the GSESP are defined as follows:<sup>1</sup>

### **A. Doctorate-Granting Institutions**

These institutions are characterized by a significant level of activity in, and commitment to, doctoral-level education as measured by the number of doctorate recipients and in diversity in doctorate program offerings. Included in this category are institutions that are not considered specialized schools (classification D below) and that grant a minimum of 30 doctoral-level degrees. These degrees must be granted in 3 or more doctoral-level program areas or have an interdisciplinary program at the doctorate level. Included in the counts of doctorate degrees are the first professional medical degrees (M.D., D.O., D.D.S., D.M.D., D.V.M., or equivalent).

A01—without a medical school

A02—with a medical school

### **B. Comprehensive Institutions**

These institutions are characterized by a strong, diverse postbaccalaureate program (including first professional), but do not engage in significant doctoral-level education. Specifically, this category includes institutions not considered specialized schools in which the number of doctoral-level degrees granted is less than 30 or in which fewer than 3 doctoral-level programs are offered. In addition, these institutions must grant a minimum of 30 postbaccalaureate degrees.

<sup>1</sup>This information is quoted from the National Center for Education Statistics Announcement, "NCES changes classification of Higher Education Institutions," April 7, 1981 (NCES 81-404).

and either grant degrees in 3 or more postbaccalaureate programs or have an interdisciplinary program at the postbaccalaureate level.

B01—without a medical school

B02—with a medical school

### C. General Baccalaureate Institutions

These institutions are characterized by their primary emphasis on general undergraduate, baccalaureate education. They are not significantly engaged in postbaccalaureate education. Included are institutions not considered specialized institutions in which the number of postbaccalaureate degrees granted is less than 30 or in which fewer than 3 postbaccalaureate-level programs are offered. Such institutions must also either (a) grant baccalaureate degrees in 3 or more baccalaureate programs, or (b) offer a baccalaureate program in interdisciplinary studies. In addition, over 75 percent of the degrees granted must be at the baccalaureate level or above.

### D. Professional and Specialized Institutions

These are baccalaureate or postbaccalaureate institutions that are characterized by a programmatic emphasis in one area, usually a professional field such as business or engineering. The programmatic emphasis is measured by the percentage of degrees granted in one program area. An institution granting over 60 percent of its degrees in one field, or granting over half of its degrees in one field and granting degrees in fewer than 5 baccalaureate programs is considered to be a professional or specialized institution.

#### D01—Divinity Institutions

Institutions in which the number of professional theological degrees plus the number of other degrees granted in theology (2300 field in the HEGIS<sup>2</sup> taxonomy) exceed 60 percent of all degrees awarded. As an alternative, the number of theological degrees awarded may exceed only 50 percent of all degrees awarded and the number of baccalaureate programs offered may be fewer than 5.

#### D02—Medical Institutions

Institutions which are primarily engaged in health science education and which offer first professional medical degrees such as M.D., D.O., D.D.S., and D.V.M. These institutions are those (a) in which the number of professional health science degrees (medicine, dentistry, osteopathy, veterinary medicine) granted, plus the number of other health science degrees (1200 field in the HEGIS taxonomy), exceed 60 percent of degrees awarded; or, in which the number of health science degrees awarded exceeds 50 percent of all degrees awarded and the number of baccalaureate programs offered is fewer than 5; and (b) which confer first-professional medical degrees.

#### D03—Other Health Institutions

Institutions which are primarily engaged in health science and which satisfy criterion (a) in D02 above but which do not confer first-professional medical degrees (M.D., D.D.S., D.O., D.V.M.).

<sup>2</sup>HEGIS—Higher Education General Information Survey

#### D04—Engineering Schools

Institutions in which the number of degrees awarded in the area of engineering (0900 field in the HEGIS taxonomy) exceed 60 percent of all degrees awarded; or, in which the number of engineering degrees awarded exceed 50 percent of all degrees awarded and the number of baccalaureate programs offered is fewer than 5.

#### D05—Business and Management Schools

Institutions which confer over 60 percent of their degrees in the area of business and management science (0500 field in the HEGIS taxonomy); or, in which the number of such degrees awarded exceeds 50 percent of all degrees awarded and the number of baccalaureate programs offered is fewer than 5.

#### D08—Education Schools

Institutions which confer over 60 percent of their degrees in education (0800 field in the HEGIS taxonomy); or, in which the number of education degrees awarded exceeds 50 percent of all degrees awarded and the number of baccalaureate programs offered is fewer than 5.

#### D09—U.S. Service Schools

Schools under Federal control.

#### D10—Other Specialized or Professional Schools

Institutions which grant degrees in fewer than three programs at the baccalaureate level, master's level, and the doctorate level, and which did not confer over 50 percent of their degrees in any of the above categories.

## statistical tables

ALL GRADUATE INSTITUTIONS	page	page
<b>Graduate Students: 1983</b>		
A-1. By field of science/engineering, highest degree granted, and enrollment status .....	20	
A-2. By field of science/engineering, type of control, sex, and level of department .....	21	
A-3. By field of science/engineering, type of control, and enrollment status .....	22	
A-4. By field of science/engineering, citizenship, and racial/ethnic background .....	23	
A-5. By field of science/engineering and category of institution in which enrolled .....	24	
A-6. By geographic distribution, highest degree granted, and enrollment status .....	25	
A-7. By geographic distribution, type of control, and citizenship .....	26	
<b>Full Time: 1983</b>		
A-8. By field of science/engineering, level of study, citizenship, sex, and type of control .....	27	
A-9. In doctorate-granting institutions by field of science/engineering, level of study, citizenship, sex, and type of control .....	28	
A-10. In master's-granting institutions by field of science/engineering, level of study, citizenship, sex, and type of control .....	29	
A-11. By sex, source of major support, and area of science/engineering .....	30	
A-12. In doctorate-granting institutions by sex, source of major support, and area of science/engineering .....	31	
A-13. In master's-granting institutions by sex, source of major support, and area of science/engineering .....	32	
A-14. By highest degree granted, source and type of major support .....	33	
A-15. By field of science/engineering and type of major support .....	34	
A-16. In doctorate-granting institutions by field of science/engineering and type of major support .....	35	
<b>A-17. In master's-granting institutions by field of science/engineering and type of major support .....</b>	<b>36</b>	
<b>A-18. By field of science/engineering, citizenship, and racial/ethnic background .....</b>	<b>37</b>	
<b>A-19. In doctorate-granting institutions by field of science/engineering, citizenship, and racial/ethnic background .....</b>	<b>38</b>	
<b>A-20. In master's-granting institutions by field of science/engineering, citizenship, and racial/ethnic background .....</b>	<b>39</b>	
<b>Part Time: 1983</b>		
A-21. By field of science/engineering, sex, and type of control .....	40	
A-22. In doctorate-granting institutions by field of science/engineering, sex, and type of control .....	41	
A-23. In master's-granting institutions by field of science/engineering, sex, and type of control .....	42	
A-24. By field of science/engineering, citizenship, and racial/ethnic background .....	43	
A-25. In doctorate-granting institutions by field of science/engineering, citizenship, and racial/ethnic background .....	44	
A-26. In master's-granting institutions by field of science/engineering, citizenship, and racial/ethnic background .....	45	
<b>Historically Black Colleges: 1983</b>		
A-27. All S/E graduate students by field of science/engineering, type of control, sex, and level of department .....	46	
A-28. All S/E graduate students by field of science/engineering, type of control, and enrollment status .....	47	
A-29. All S/E graduate students by field of science/engineering, citizenship, and racial/ethnic background .....	48	
A-30. Full time by field of science/engineering, level of study, citizenship, sex, and type of control .....	49	
<b>A-31. Full time by sex, source of major support, and area of science/engineering .....</b>	<b>50</b>	
<b>A-32. Full time by field of science/engineering and type of major support .....</b>	<b>51</b>	
<b>Postdoctorates: 1983</b>		
A-33. By field of science/engineering, source of support, and citizenship .....	52	
A-34. In public institutions by field of science/engineering, source of support, and citizenship .....	53	
A-35. In private institutions by field of science/engineering, source of support, and citizenship .....	54	
A-36. Male postdoctorates by field of science/engineering, source of support, and citizenship .....	55	
A-37. Female postdoctorates by field of science/engineering, source of support, and citizenship .....	56	
A-38. Postdoctorates and other non-faculty doctoral research staff by field of science/engineering and highest degree granted .....	57	
A-39. In public institutions by field of science/engineering and highest degree granted .....	58	
A-40. In private institutions by field of science/engineering and highest degree granted .....	59

NSF FORM 811  
NOVEMBER 1983

NATIONAL SCIENCE FOUNDATION AND NATIONAL INSTITUTES OF HEALTH  
 SURVEY OF GRADUATE SCIENCE AND ENGINEERING STUDENTS AND POSTDOCTORATES, FALL 1983  
 INSTRUCTIONS FOR SURVEY COORDINATOR

FORM APPROVED  
 OMB NO. 3145-0062  
 APP. EXP. 12/31/86

PAGE 1 OF 2

INSTITUTION: 003367-0-0 ST JOSEPH'S UNIVERSITY

1. Please review the list of departments and programs printed on the following pages for accuracy and completeness. Please add any newly formed graduate science or engineering departments or programs in the spaces provided at the end of the departmental/program list and note any name changes or reorganizations where they occur.
2. Please cross out any discontinued or non-science programs on the departmental/program list. Those which do not have graduate students or postdoctorates in fall 1983 but may have them in the future should NOT be crossed out; a check in column (6) of the departmental/program list can be used in place of a Form 812 for such departments/programs.
3. A Crosswalk, listing relevant fields of science/engineering is enclosed, showing the 3-digit NSF code and comparable NCES discipline codes for each. Please review the first 3 digits of the codes in column (2) of the departmental/program list to verify the discipline to which each department or program has been assigned. If you do not agree with this code, note the discipline code to which your department or program most closely corresponds.
4. IN MEDICAL SCHOOLS ONLY, departments or programs followed by a single asterisk (\*) include the indented sections or specialties listed beneath them. These sections or specialties may be without organizational autonomy; however, separate data are requested because of special NIH interest in these areas. Please be sure that no duplicate data are reported for the sections/specialties and their parent programs.
5. Please distribute the enclosed Forms 812 to all listed and newly formed departments or programs if data cannot be obtained from your centralized files. Definitions for all data items requested are provided on the Forms 812. Please follow these guidelines when completing the forms.
6. Please review the Forms 812 for completeness and reporting consistency and verify or supply the highest degree program offered by each department or program. Please check this year's data against the previous year's data shown on the departmental/program list and indicate the validity of large year-to-year shifts in the "Notes and Comments" section below or on the individual Forms 812.
7. Please exclude from your response all graduate departments in the fields of education, law, humanities, music, the arts, physical education, library sciences, and all other non-science fields.
8. Please return one copy of Form 811 (this form) along with one copy of each of the completed Forms 812 by FEBRUARY 10, 1984. Please use the franked envelope provided and return to:  
 Universities and Nonprofit Institutions  
 Studies Group  
 Room L-602  
 National Science Foundation  
 1800 G Street, N.W.  
 Washington, D.C. 20550
9. Care should be taken to submit as complete and accurate a report as possible so that follow-up procedures with your institution can be reduced to a minimum and more timely statistics can be made available. If there are any questions concerning your response, please call Cathy Joseph or Diane Stoner at (617) 492-7100. Thank you.

## SURVEY COORDINATOR:

NAME: DR F GRAHAM LEE  
 TITLE: CHAIRMAN, DEPT OF CHEMISTRY  
 ADDRESS: ST JOSEPH'S UNIVERSITY  
 5800 CITY AVENUE  
 PHILADELPHIA, PENNSYLVANIA 19131

TELEPHONE: 215 879-7780

## \*\* 1982 RESPONSE CODE MEANINGS:

1 - RESPONDED

\*\*\* THE FIRST THREE DIGITS OF THE DEPARTMENT CODE ARE A FIELD OF SCIENCE CODE; A LIST OF THESE CODES IS ENCLOSED.

Note: This information is solicited under the authority of the National Science Foundation Act of 1950 as amended. All information you provide will be used for statistical purposes only. Your response is entirely voluntary and your failure to provide some or all of the information will in no way adversely affect your institution.

# INSTRUCTIONS FOR SURVEY OF GRADUATE SCIENCE AND ENGINEERING STUDENTS AND POSTDOCTORATES, FALL 1983

## General Definitions

A graduate science/engineering (S/E) student is defined as a student enrolled for credit in an advanced-degree program leading to either a master's or Ph.D. degree in fall 1983. M.D., D.V.M., or D.D.S. candidates, interns, and residents should not be reported unless they are concurrently working for a master's or Ph.D. in a science or engineering field or are enrolled in a joint M.D./Ph.D. program. Individuals who already hold an M.D., D.V.M., or D.D.S., master's or Ph.D. degree but who are working on another master's or Ph.D. degree are to be counted as graduate students, either full or part time. Do not report such individuals as postdoctorates in item 8.

Graduate S/E students performing thesis or dissertation research away from the campus at Government and contractor-owned facilities in the United States are to be included as long as they are enrolled for credit in an advanced-degree program. Students enrolled at a branch or extension center in a foreign country are to be excluded.

A graduate S/E student, whether full- or part-time, should be reported in only one department. If any students are in interdisciplinary programs, please be sure that they are counted only once by their "home" department. If a graduate student is enrolled in an inter-institutional program, please report the student only if the degree will be granted by your institution. Please report in terms of headcounts, not in full-time-equivalent (FTE) terms. Please do not report decimals or fractions. If data are unavailable or unknown, write "unavailable" or "unknown" in the blank. "N/A" means "not applicable" on this form.

## Item Instructions and Definitions

**HIGHEST DEGREE OFFERED**, item 4: Check the item which refers to the highest degree program offered by this science/engineering department in fall 1983. If your department does not offer a graduate degree, but is a department of clinical medicine with or without postdoctorates, check (3).

**FULL-TIME GRADUATE S/E STUDENTS**, item 5: A full-time graduate student is defined as a student enrolled for credit in an advanced-degree program (not a regular staff member or a postdoctorate) who is engaged

full time in training activities in his/her field of science/engineering; these activities may embrace any appropriate combination of study, teaching, and research, depending on your institution's own policy. If your department has no full-time graduate students, write "None" in item 5 and move to item 6.

**MECHANISMS OF SUPPORT**, item 5, lines (1)-(5): Report each full-time graduate S/E student only once according to the source of the largest amount of support received in the fall of 1983. Students receiving equal amounts of support from two or more sources should be reported only once, under one of the sources. Students who receive fellowships or traineeships should be reported on line (1) or (2) respectively, if either of these mechanisms constitute the largest source of his/her support. The Federal Interagency Committee on Education (FICE) differentiates between the two fellowship and traineeship stipends as follows: 1) A fellowship is an award made directly to or on behalf of a student selected in a competition, usually national in scope, to enable him to pursue post-baccalaureate training, and 2) a traineeship is an educational award to a student selected by his university. Except for the student selection process, the terms and conditions of the two types of awards are generally identical. A student receiving his/her main support from an assistantship should be classified as a research assistant on line (3) or as a teaching assistant on line (4), depending on how he/she spends the majority of his/her time, e.g., a graduate assistant devoting most of his/her time to teaching should be classified as a graduate teaching assistant. All other full-time graduate students, including members of the armed forces whose tuition is paid by the Department of Defense, should be reported on line (5).

**STUDENTS RECEIVING FINANCIAL ASSISTANCE**, item 5, columns (A) through (H): Report the number of full-time graduate S/E students in the appropriate column according to the source of the largest portion of their support. To determine the source, consider only tuition and other academic expenses. If a graduate student receives equal support from more than one source, report student under only one source.

**FEDERAL SOURCES**, columns (A) through (E): Report the number of full-time graduate S/E students in the

appropriate column where they receive the largest portion of their support. Full-time graduate S/E students receiving the largest portion of their support from Federal Government loans should be reported as self-supported, column (I).

**Department of Defense (DOD)**, column (A): Report full-time graduate S/E students receiving support from the Department of the Army, Navy, or Air Force. Students receiving their main support from the Veterans Administration under the G.I. Bill should be reported under column (E) "Other Federal Sources"; if this form of support does not constitute his/her main source, the student should be counted in the appropriate column representing that source.

**Department of Health and Human Services (HHS)**, columns (B) and (C): Report full-time graduate students receiving support from the institutes or divisions of the National Institutes of Health (NIH) under column (B); support from all other components of HHS should be reported under column (C), as indicated below:

**National Institutes of Health**, report in column (B):  
 Division of Research Resources  
 National Cancer Institute  
 National Eye Institute  
 National Heart, Lung, and Blood Institute  
 National Institute on Aging  
 National Institute of Allergy and Infectious Diseases  
 National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases  
 National Institute of Child Health and Human Development  
 National Institute of Dental Research  
 National Institute of Environmental Health Sciences  
 National Institute of General Medical Sciences  
 National Institute of Neurological and Communicative Disorders and Stroke  
 National Library of Medicine

**Other HHS**, report in column (C):  
 Alcohol, Drug Abuse, and Mental Health Administration (including National Institute of Mental Health)  
 Center for Disease Control  
 Food and Drug Administration  
 Health Resources Administration  
 Health Services Administration  
 Office of Human Development

**Other Federal sources**, column (E): Report the number of full-time graduate S/E students receiving support from all other Federal agencies, including the Department of Education.

**NON-FEDERAL SOURCES**, columns (F) through (H):  
**Institutional support**, column (F): Report full-time graduate S/E students receiving support from your own institution, including those supported through tuition waivers, and by State and local governments. Students supported by funds given to a university by the Federal Government, such as training grant funds, should be reported under the appropriate Federal agency and NOT reported as institutional support.

**Foreign sources**, column (G): Include support from any non-U.S. source.

**Other U.S. sources**, column (H): Include support from nonprofit institutions, private industry, and all other U.S. sources.

**SELF-SUPPORTED STUDENTS**, column (I): Include full-time graduate S/E students whose main source of support is derived from loans from any source and from personal or family financial contributions. Full-time graduate S/E students receiving the largest portion of their support from Federal loans should be reported here. Note that these students should be included in the total, column (J). Foreign self-supported students are to be reported here, also.

**Women**, line (7): Report all women S/E students by their source of main support. Please note that in each column, data on line (7) should not exceed the total on line (6).

**First-year students**, lines (8) and (9): A first-year student is defined as one who will have completed less than a full year of graduate study as of the beginning of the fall term in 1983 in the S/E program in which he/she is enrolled for a degree. All other graduate S/E students should be considered beyond their first year.

**PART-TIME GRADUATE S/E STUDENTS**, item 6:  
A part-time graduate student is defined as a student who is enrolled in an advanced-degree program who is NOT pursuing graduate work full time as defined in item 5. Report the total number of part-time graduate students on line (1); if a department has no part-time graduate students, enter "None" and move to item 7.

**CITIZENSHIP AND RACIAL/ETHNIC BACKGROUND**, item 7: Racial/ethnic designations as used in this survey do not denote scientific definitions of anthropological origins; a graduate student may thus be included in the group to which he/she appears to belong, identifies with, or is regarded in the community as belonging. No person should be counted in more than one racial/ethnic group, however, and only those with U.S. citizenship should be reported in columns (A) through (F).

On line (1), report the total number of full-time S/E graduate students under the appropriate racial/ethnic category. The total for each line should equal the sum of columns (A) through (G). The total for full-time enrollment shown in item 7 should match the total shown in item 5; similarly, the part-time total shown in item 7 should equal the total in item 6.

The following racial/ethnic designations are those defined by the Office of Civil Rights:

**U.S. CITIZENS**: columns (A) through (E):

**Black, non-Hispanic**, column (A): Report persons having origins in any of the black racial groups (except those of Hispanic origin).

**American Indian or Alaskan Native**, column (B): Report persons having origins in any of the original peoples of North America.

**Asian or Pacific Islander**, column (C): Report persons having origins in any of the original peoples of the Far East, Southeast Asia, or the Pacific Islands. These areas include China, Japan, Korea, the Philippine Islands, and Samoa.

**Hispanic**, column (D): Report persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

**White, non-Hispanic**, column (E): Report persons having origins in any of the original peoples of Europe, North Africa, the Middle East or the Indian subcontinent, except those of Hispanic origin.

**OTHER AND UNKNOWN**, column (F): If department records are not complete as to racial/ethnic origin of some graduate students, please report in column (F) those students with U.S. citizenship whose origins are not listed in item 7, as well as those whose origins are unknown.

**FOREIGN**, column (G): Please report all foreign students, whether nonresident alien or holding a permanent visa, in column (G). A foreign graduate student is defined as an individual who has not attained U.S. citizenship. Do not include native residents of a U.S. possession, such as American Samoa. Applicants for U.S. citizenship are to be considered as foreign until the date their citizenship becomes effective.

**POSTDOCTORATES AND NON-FACULTY DOCTORAL RESEARCH STAFF**, item 8: Include as postdoctorates those individuals with science or engineering Ph.D.'s, M.D.'s, D.D.S.'s, or D.V.M.'s (including foreign degrees that are equivalent to U.S. doctorates) who devote their primary effort to research activities or study in the department under temporary appointments carrying no academic rank. Such appointments are generally for a specific time period. They may contribute to the academic program through seminars, lectures, or working with graduate students. Their postdoctoral activities provide additional training for them. Exclude clinical fellows and those with appointments in residency training programs in medical and health professions, unless research training under the supervision of a senior mentor is the primary purpose of the appointment.

On line (1), under columns (A) and (B), enter the number of fellows and trainees receiving support under Federal fellowships and/or training grants. Under column (C) enter the number of postdoctorates who are receiving federally supported research grants. Those remaining postdoctoral appointees receiving non-Federal support should be entered under column (D). Of the total in column (E), enter in column (F) the number of postdoctorates who are foreign.

Under other non-faculty doctoral research staff, column (G), report all doctoral scientists and engineers who are principally involved in research activities but who are considered neither postdoctoral appointees nor members of the regular faculty. In column (H), report the total of columns (E) and (G).

On line (2), report the number of women in each category. On line (3) report those postdoctorates and non-faculty doctoral research staff who hold first professional medical degrees (M.D., D.D.S., D.V.M., etc.). Please note that in each column, data on lines (2) and (3) should not exceed the total on line (1).

**FULL-TIME S/E FACULTY**, items 9 through 11: Include all full-time S/E faculty in your department regardless of whether they instruct graduate or undergraduate students. Please note that while items 5 through 9 and 12 request data for fall 1983, items 10 and 11 request data on faculty present during the 1982/83 academic year.

In item 9, include all ranks from instructor to professor. Include full-time members of your department who are on sabbatical leave away from your institution. Persons with joint appointments who work part of their time in another department should be treated as follows: Those working more than one-half their time in this department should be included here; those working less than one-half time in this department should be included in the other department; if

they work exactly half time in each, please consult with the chairperson of the other department as to which one will include the appointee. Please DO NOT include the following as full-time faculty: Visiting professors, postdoctorates, research associates, graduate assistants, or others who are not regular FULL-TIME S/E FACULTY in this department. The data reported in column (D) are a subset of the non-tenured personnel reported in column (B).

In item 10, include all full-time S/E faculty that your department appointed for service to begin during the academic year 1982/83. How many of these new appointees held full-time faculty or staff appointments in another academic institution immediately prior to their joining your department? What tenure status were they

given in your department at the time of their appointments?

In item 11, include all members of this department who held full-time S/E faculty appointments in September 1982 and left the department between September 1, 1982, and August 31, 1983, for one of the reasons listed. (Count each person only once; in case of multiple reasons, choose the one in your opinion that was most important.)

**NON-FACULTY S/E DOCTORAL RESEARCH STAFF**, item 12: Include persons employed by the department in fall 1983 in a professional capacity specifically for research activities, who hold S/E doctorates on the date this survey form is filled out, who do not have a faculty appointment, and who are not postdoctorates. (The total in column (C) should be the same as reported in item 8, column (G), line (1).)

UPON COMPLETING THIS FORM, PLEASE RETURN IT  
TO YOUR SURVEY COORDINATOR.

**NATIONAL SCIENCE FOUNDATION and NATIONAL INSTITUTES OF HEALTH**  
**Survey of Graduate Science and Engineering Students and Postdoctorates, Fall 1983**

**DEPARTMENTAL OR PROGRAM DATA SHEET**

Before filling out, please read the instructions. Upon completion, return form to your survey coordinator.

1 Name and address of institution _____		(LEAVE BLANK)	
		Response code <input type="checkbox"/>	
2 Name of science or engineering department (or program) covered by this data sheet _____		Institution and department code	
3 Person in department (or program) preparing this form			
Name _____			
Title _____		Phone ( ) _____	
4 Highest degree offered by department or program in fall 1983 (CHECK ONE ONLY)		Doctorate (1) Master's (2) No graduate degree offered (3)	
If your department or program does not enroll graduate students, please move to item 8 below. For identification of S/E fields classification, see your coordinator's NSF/NCES "Crosswalk." If data are unavailable or unknown, write "unavailable" or "unknown" in the blank. "N/A" means "not applicable" on this form.			

5 Number of FULL-TIME GRADUATE S/E STUDENTS enrolled for advanced degrees (master's and doctorate) in fall 1983		STUDENTS RECEIVING FINANCIAL ASSISTANCE									SELF-SUPPORTED STUDENTS (including loans and family sources)	TOTAL FOR ALL SOURCES (Sum of (A) thru (I))
		FEDERAL SOURCES (excluding loans)				NON-FEDERAL SOURCES						
		MECHANISMS OF SUPPORT	Department of Defense (A)	HHS		National Science Foundation (D)	Other Federal sources (E)	Institutional support <sup>1</sup> (F)	Foreign sources (G)	Other U.S. sources <sup>2</sup> (H)		
Graduate Fellowships	(1)			National Institutes of Health (B)	Other HHS (C)							
Graduate Traineeships	(2)											
Graduate Research Assistantships	(3)											
Graduate Teaching Assistantships	(4)											
Other Types of Support	(5)											
<b>FULL-TIME TOTAL</b>	<b>(6)</b>											
For each total on line (6) how many are WOMEN?	(7)											
<b>FIRST-YEAR STUDENTS</b>	<b>(8)</b>	Of the full-time graduate students on line (6), column (J), how many are FIRST-YEAR students?										
<b>FIRST-YEAR WOMEN STUDENTS</b>	<b>(9)</b>	Of the full-time FIRST-YEAR graduate students on line (8), how many are WOMEN?										

<sup>1</sup>Include support from this university and State and local governments.

<sup>2</sup>Include support from nonprofit institutions, industry, and all other U.S. sources.

6 Number of PART-TIME GRADUATE S/E STUDENTS, FALL 1983

PART-TIME TOTAL

(1)

Of the part-time total on line (1), how many are WOMEN?

(2)

274

273

7 RACIAL/ ETHNIC BACKGROUND OF GRADUATE S/E STUDENTS, FALL 1983	Of the graduate student totals in items 5 and 6, how many belong to the following racial/ethnic categories?		U.S. CITIZENS ONLY						FOREIGN (G)	TOTAL (sum of (A) thru (G)) (H)
			Black non- Hispanic (A)	Amer Indian/ Alaskan Native (B)	Asian/ Pacific Islander (C)	Hispanic (D)	White non- Hispanic (E)	Other or unknown (F)		
	Full-time, column (H), should equal item 5, line (8); column (J)	(1)								
	Parttime, column (H), should equal item 6, line (1)	(2)								

Is Racial/Ethnic Background data available at department level? \_\_\_\_\_ If not, where available? \_\_\_\_\_

8 Number of S/E POSTDOCTORATES and NON-FACULTY DOCTORAL RESEARCH STAFF, FALL 1983 (Include those affiliated with this department as well as those employed in associated academic research units. Exclude clinical fellows and residents not involved in research.)	POSTDOCTORATES						OTHER NON- FACULTY DOCTORAL RESEARCH STAFF (G)	TOTAL (Sum of (E) and (G)) (H)		
	SOURCE OF SUPPORT			TOTAL for all sources (A) thru (D) (E)	Of the total in (E), how many are FOREIGN? (F)					
	Federal (A)	Traineeships (B)	Research grants (C)							
TOTAL	(1)									
Of the total in each cell of line (1), how many are WOMEN?	(2)									
Of the total in each cell of line (1), how many hold the M.D., D.O. or D.V.M. degree?	(3)									

9 RANK AND TENURE STATUS OF FULL-TIME S/E FACULTY, Fall 1983				
Academic rank	Tenured (A)	Non- tenured (B)	TOTAL (C)	Of those in column (B), how many are in tenure track? (D)
Professor (1)				
Associate professor (2)				
Assistant professor (3)				
Other ranks (4)				
Non-ranked (5)				
Total (6)				

Appointments	Tenure status as of date of appointment		TOTAL (C)
	Tenured (A)	Non-tenured (B)	
Total	(1)		
Of those in line (1) above, how many joined your department from full-time faculty or staff positions in another academic institution? (Do not report transfers within your institution)	(2)		

## 11. FULL-TIME S/E FACULTY DEPARTING during academic year 1982/83

Reason for leaving	Tenure status of full-time S/E faculty leaving		Total (C)
	Tenured (A)	Non-tenured (B)	
Retirement, illness, or death (1)			
Voluntary resignation for another academic position (2)			
Voluntary resignation for a position in business or industry (3)			
Voluntary resignation for other reasons (4)			
Failure to receive tenure (5)			
Involuntary resignation for other reasons (6)			
Total (7)			

## 12. OTHER NON-FACULTY S/E DOCTORAL RESEARCH STAFF, fall 1983

Number receiving doctorates before fall 1976 (A)	Number receiving doctorates in fall 1976 or later (B)	TOTAL See item 8, column (G), line (1) (C)

## Check List

- 1. Do all entries reflect headcounts and NOT FTE's?
- 2. Do the data in items 5, 7, and 8 add to totals?
- 3. Have you included all self-supported full-time graduate S/E students in item 5, column (I)? Note that self-supported students should also be included in the total column (J).
- 4. Have you excluded M.D., D.D.S., and D.V.M. candidates, interns, and residents (except those enrolled in joint programs with the Ph.D.) from items 5, 6, and 7?
- 5. Does item 5, line (6), column (J) equal item 7, line (1), column (H)?
- 6. Does item 6, line (1) equal item 7, line (2), column (H)?
- 7. Is item 9, column (D) equal to or less than item 9, column (B)?
- 8. Does item 12, column (C) equal item 8, column (G), line (1)?

Approximately how many personhours were required to complete this form?

Comments (including explanations of any variances from prior year's data):

## Science Resources Studies Highlights

### R&D Funds

- "7% Real Growth Expected in 1985 National R&D Expenditures: Defense and Economy Major Factors" ..... 85-304 .....
- "Defense and Space Research and Development Emphasized in 1985 Budget" ..... 84-333 .....
- "Plans for Company-Funded Research and Development Show 12% Annual Increases Through 1985" ..... 84-329 .....
- "1983 Plant Biology Research Expenditures Totaled \$200 Million and Were Concentrated in Land-grant Institutions" ..... 84-327 .....
- "Despite Recession, Companies' Own R&D Funding Rose 13% During 1982" ..... 84-314 .....
- "Real Growth in Federal R&D Funds Estimated at 12% in 1984—Largest Increase Since Midsixties" ..... 84-302 .....

### S/E Personnel

- "Ph. D. Scientists and Engineers Continue Shift to Industrial Employment" ..... 85-301 .....
- "Women and Non-U.S. Citizens Responsible for Increase in Production of Science and Engineering Doctorates in 1983" ..... 84-321 .....
- "Science and Engineering Jobs Grew Twice as Fast as Overall U.S. Employment with Industry Taking the Lead" ..... 84-319 .....
- "One-fourth of Academic Research Equipment Classified Obsolete" ..... 84-312 .....

NSF  
No. Price

- "1982 Job Market for New Science and Engineering Graduates About the Same as That of Previous Years" ..... 84-310 .....
- "Industry Reports Shortages of Scientists and Engineers Down Substantially From 1982 to 1983" ..... 84-303 .....
- "1982 Doctorate Production Stable in Science and Engineering Fields, But Down in Science and Mathematics Education" ..... 83-330 .....
- "No Change in Science and Engineering Student Quality Seen by 60% of Academic Officials: At Least 25% Perceive Improvement" ..... 83-322 .....

NSF  
No. Price<sup>7</sup>

- Scientists, Engineers, and Technicians in Manufacturing and Nonmanufacturing Industries: 1980 and 1981 ..... 83-324 .....

## Reports

### R&D Funds

- Federal Funds for Research and Development, Fiscal Years 1982, 1983, and 1984, Volume XXXII ..... 84-326 .....
- Trends in Small Companies' R&D Expenditures ..... 84-324 .....
- Federal R&D Funding by Budget Function: Fiscal Years 1983-85 ..... 84-316 .....

### S/E Personnel

- Scientific and Technical Work Force in Trade and Regulated Industries Shows Major Shift in Occupational Composition: 1979-82 ..... 84-323 .....
- Women and Minorities in Science and Engineering ..... 84-300 .....

### Composite
